Cleanroom Expansion

Until end of 2018 Harro Höfliger is expanding its Cleanroom Capacities

Since fall 2017 Harro Höfliger is working on the expansion of the clean room facilities and an extensive modernization of the laboratory venue.

The reason for the construction activities is the ever more frequent customer demand for carrying out tests with an optimum of practical relevance and machine acceptance tests being carried out under realistic conditions with in some cases highly active original products. "With an expansion from four to ten cleanrooms and the modernization of our laboratories, we are offering our customers additional capacity. State-of-the-art air-conditioning technology guarantees individual control. This is the only way to comply with the specified conditional circumstances for the processing of what are frequently highly sensitive products," says Stefan Mayer, Manager Process Services Division at Harro Höfliger. With this investment, we will be able to address our customers' demands with greater flexibility and even more individually in the future.

After the planned completion of the expansion work in the fall of 2018, Harro Höfliger will have a total test area of about 500 sqm and a laboratory area of 60 sqm at their disposal. A sophisticated building concept ensures that some cleanrooms will always be available during the reconstruction phase to keep operation procedures on track without major interruptions. The first four new cleanrooms were put in operation in March 2018.

About Harro Höfliger

Harro Höfliger Verpackungsmaschinen GmbH with its headquarters in Allmersbach im Tal is a family run specialist for the manufacture of production and packaging machines. The focus is on engineering customized process and turnkey system solutions for pharmaceutical and medical applications. The company has developed into an international technology leader for the micro-dosing of inhalable powders, the processing of web materials, as well as machines for product assembly. In the year 2017, almost 1,200 employees generated a turnover of € 227 million. Harro Höfliger is a member of Excellence United, a strategic alliance of five leading German machine and system manufacturers.
